Research Interest

I am interested in understanding and quantifying the human body through gathering and analyzing health data. Currently, I am excited about the opportunities with affordable sensor technologies and at-home micro sampling devices for multi-omics profiling. I investigate these fields through my role as a Ph.D. student in the Snyder lab at Stanford where I lead the Stanford Center for Personalized Health (stanford-health.github.io). Previously I have conducted and supervised research in the field of bioinformatics (protein structure and function), diabetes glucose monitoring, and building generalizable neural components for machine learning.

Education

Stanford University

PH.D. COMPUTER SCIENCE

- **Advised by Professor Michael P. Snyder**
- **2020 Fulbright Scholar**

Stanford, California, USA

Sep 2020 - est. Jun 2026

Technical University of Denmark

M.Sc. MATHEMATICAL MODELING AND COMPUTATION, GPA: 11.44/12.00

- **Nanyang Technological University**, Singapore — *Semester Abroad Fall 2015*
- **Honors program**, Supervised by Professor Ole Winther

Kongens Lyngby, Denmark

Sep 2014 - Dec 2016

Copenhagen Business School

B.Sc. BUSINESS ADMINISTRATION AND INFORMATION SYSTEMS, GPA: 10.70/12.00

- **Lincoln University**, Canterbury, New Zealand — *Semester Abroad Fall 2013*

Frederiksberg, Denmark

Sep 2011 - Jun 2014

Experience

Stanford University

STANFORD CENTER FOR PERSONALIZED HEALTH

As a part of my Ph.D. I founded, and am currently managing, the Stanford Center for Personalized Health where I organize research projects on quantifying the human body. Beyond me, the lab currently includes eight researchers (4 high school, 1 undergraduate, 1 independent, 1 PhD, 1 Post Doc) and project collaborators from the Snyder lab and the Stanford School of Medicine. We meet every week and the research agenda and current roster can be found at stanford-health.github.io.

Stanford, California, USA

Juli 2021 -

Ocean.io

HEAD OF DATA SCIENCE RESEARCH

Developing and deploying state-of-the-art NLP projects at scale. Time divided between Copenhagen, Denmark and Kiev, Ukraine.

Copenhagen, Denmark

Feb 2020 - est. Sep 2020

Technical University of Denmark

RESEARCH PROJECT MANAGER

Inspired by my time at Salesforce Research, I started a student based research lab with research meetings every Tuesday and one-on-ones every Thursday. More than 30 students (M.Sc. and Ph.D.) have participated in the lab in 2019 resulting in several publications. To find research projects I collaborated with professors and Ph.D. students at the university on hot topics and datasets. The majority of the participants had previously done projects with me in the 02456 Deep Learning course.

Kongens Lyngby, Denmark

Jan 2019 - Jan 2020

Salesforce

DEEP LEARNING RESEARCH, INTERN

Under the supervision of Richard Socher (Salesforce Research) I researched in probability based decision making (+100k impression blogpost, ACL workshop paper); multi-task learning for NLP; and mixture-of-experts using distributed computing, PyTorch, and TorchText.

Palo Alto, California, USA

Jan 2017 - Jan 2018

Teaching

Technical University of Denmark

DEEP LEARNING, 02456

In 2018 and 2019 I was the head TA with significant course material contributions. Half of the course is project based and I supervised the NLP, Bioinformatics, and RL projects; the most popular amongst students for 2018 and 2019.

Head TA

Fall 2016, Fall 2018, Fall 2019

MASTER THESIS SUPERVISION

Co-Supervisor

Spring 2019, Fall 2019, Spring 2020

I have co-supervised 16 Master Thesis projects (an M.Sc. thesis is 5 months full-time). The thesis' have investigated formal languages, Levenhstein transformer, multi task learning, exploration in VQA, bio-/, and cheminformatics; resulting in multiple academic contributions.

Co-Supervisor

SPECIAL COURSES

Spring 2019, Fall 2019

I have supervised 11 special course projects (a special course is 4 months part-time). Similar to M.Sc. thesis, the special courses have investigated topics within deep learning methods and applications.

Course Responsible

INTRO REINFORCEMENT LEARNING

Spring 2019

Exercises from Chap 1-13 in Sutton & Barto and Homework 1-2 from UC Berkeley's Deep RL course. 9 Students (M.Sc. and Ph.D.).

Course Co-Responsible

DEEP REINFORCEMENT LEARNING

Jun. 2019

Adjusted version of UC Berkeley's Deep RL course, co-supervised with Ass. Prof. T. Herlau. 10 students (M.Sc. and Ph.D.).

Community

Deep Learning Copenhagen

MeetUp

FOUNDER

Nov. 2018 - Dec. 2019

Inspired by Stanford's public poster exam in CS224N in 2017 I convinced Professor Ole Winther to do the same for our 02456 Deep Learning course. With student posters, company sponsored first prize, drinks, and pizza. Given the positive feedback, I was hired by the university, started a research lab for students, and kept hosting events to celebrate the students projects. This was a lot of fun and resulted in seven events, +1.5k participants, and multiple company sponsorships. (Event page: <https://www.meetup.com/Deep-Learning-DTU/>).

Community research

Zoom

FOUNDER

Jan. 2020 - now

I help independent researchers who wants to pursue graduate studies and provide free supervision and problem statements to help them publish papers and get recognized.
